

Visora / Lumiverse XR

Immersive AR, VR and AI
Learning Platform

Problem

- Traditional learning is passive and lacks engagement.

Solution

- Browser-based AR/VR experiences powered by Three.js and WebXR.

Target Audience

- Nursery to Grade 12 students, schools, parents, coaching centers.

Product Vision

- Learning Beyond Books with AR, VR and AI.

Curriculum Coverage

- Nursery through Grade 12 immersive learning modules.

AR Experiences

- Solar System, Anatomy, Animals, Geography, Science.

VR Experiences

- Virtual Labs, Space Missions, Ocean Explorer, History Tours.

AI Features

- AI Tutor, Lesson Generator, Personalized Learning Paths.

Teacher Dashboard

- Assignments, analytics, assessments, reporting.

Parent Dashboard

- Progress tracking, insights, screen-time monitoring.

Gamification

- Badges, XP, rewards, streaks, leaderboards.

Technology Stack

- React, Next.js, Three.js, WebXR, Node.js, AWS.

Revenue Model

- Subscriptions, school licensing, white-label offerings.

Roadmap

- MVP → AI Tutor → Virtual Labs → Multi-user XR classrooms.

Investment Opportunity

- Scalable global EdTech platform leveraging immersive learning.
